

SoundCHECK & bioluminescence

Learn skills in the creative industries for free and perform at Cobargo Folk Festival 2024!

Are you aged 12-24. Want to get hands on with technology, learn skills in the creative industry and be a big part of the Cobargo Folk Festival?

This can happen through two exciting programs **SoundCheck** and **Bioluminescence** that will get young people front and centre at the Festival.

Choose your own adventure!!

Option 1 - Soundcheck will give you skills to MC, write music and understand music production technology. Learn all of this and more across six Saturday workshops and two days at the Cobargo Folk Festival.

Option 2 - Bioluminescence will get you hands on with the latest lighting and projection technology while lighting up the main arena on the Saturday night of the Festival. Bioluminescence is back at Cobargo Folk Festival this year but with more! Along with the amazing video projections they do they are also building a creative light installation for the main arena using repurposed solar panels, batteries and way too many LED lights! Learn all of this across two Saturday workshops in February and three days at the Festival.

Both programs are free! Supported by the Yuin Folk Club, Cobargo Community Access Centre, Cobargo Community Bushfire Fund, Renewable Cobargo and the Cobargo Folk Festival.

SoundCheck Workshops:

Saturday 3rd Feb 10am - 4pm - Introduction to Songwriting with Aria Award winner Tony King.
